Innovative Veterinary Supplies

About Us

Welcome to our new business Vetshop.ie. After 25+ years in supplying veterinary clinics with Novavet Animal Health products we've got to know the needs of a modern vet & their surgeries. We have put together a selection of products & services which we think will be of assistance to you & your staff. We also pride ourselves in sourcing innovative products & solutions to the ever changing world of veterinary surgeons.

Thank you

DR System

The future of radiography starts here.

For faster workflow in your radiology department try Novavet's new DR system - reliable, efficient and easy to use!

- Superior quality of image with lower radiation exposure.
- Increased reliability with more sensitivity.
- Easy installation and easy multi-modality sharing.
- Wi-fi signal ability to pass through walls has been strengthened and improved.
- Full 3 year warranty on our DR plate.

Simple to use with great results

For faster workflow in your radiology department try Novavet's new DR system - reliable, efficient and easy to use!

- Our DR system increases speed and productivity and gives great value for money
- Laptop connects directly to plate with no additional AP or router, giving a more efficient digital image.
- Four hour battery life gives a minimum of five hundred exposures.
- Digital image is generated within ten seconds!

HF X-Ray Generator

The new High Frequency, Light Weight, Portable X-Ray Generator, for use in Small animal and Equine Clinics.

System Benefits:

- Ultra-miniature Hi-frequency type Portable x-ray
- 180(W)×205(D)×165(H) 9.5kg
- 100kVp, 50mAs, 50kHz
- Easy scanning of KUB, L-paine, Abdomen etc., safe and clear resolution
- Significantly reduces radiation dose when set at mA, kVp, which adjusts the exposure time automatically

Novavet Navicular Block System

Innovative Navicular Block

Novavet prides itself in bringing unique and skilfully designed products to the veterinary world.

Our innovative products, which are designed and manufactured in Ireland, include a navicular block complete with all necessary angles. It comes with 45, 55, 60 and 65 degree angles and a polycarbonate plate holder enabling hands free imaging.

45, 55, 60
and 65 degree
angles

Combi Box

Clean, line free images

Our combi box is manufactured from 20mm polycarbonate and enables the Vet to shoot lateral, medial lateral, AP and skyline images.

Accessories: Strap on shoe

One of the most popular products in our range is our strap on shoe which enables the Vet to take images without the worry of the horse moving.

Our strap on shoes are manufactured from a robust 40mm polypropylene therefore only a one off purchase is required. The unique design eliminates the concern of the horse stepping off the traditional block.

Protective Eye Glasses

Unique design of eye glasses protects from radiation from both the front and the side

X-Ray Protective Surgical Apron

Protective Thyroid Collar

- Thyroid collar used to completely protect neck and sternum
- Soft & comfortable
- Lead equivalent 0.5mmPb
- Adjustable Velcro panels
- Wide coverage area

Protective Gloves

Lead equivalent 0.5mmPb

Novafloat Cordless

The Novafloat Cordless combines 15 years of floating experience with Swiss engineering & manufacturing!

The Novafloat has all the features a dental float should have: it is light weight, battery powered, with a flexible shaft, rotating head, and interchangeable discs or burrs. It is water resistant, maintenance free, durable and affordable. It represents a new generation of dentistry instruments for routine or advanced procedures.

Rechargeable Speculum Light

Drop Forged Millennium Speculum with Biothane Straps

This premium quality drop forged Equine speculum has small but deep ratchet settings to ensure a comfortable fit on each individual horse.

A durable spring lock, easy to operate mechanism is fitted in these speculums, which provides great assistance in keeping the horse's mouth open, and closing can be controlled by releasing the spring on both sides.

Comes with hardwearing biothane straps that are waterproof and easy to clean. This horse dental gag comes with a "spreader bar effect" that keeps the sides of the speculum bent outwards and do not collapse into the horse's cheek during dental procedures.

Fulcrums

Plastic Bite Plate

Wraps/Bandages

Patterned wraps

Leukopor Tape 2.5cm x 5m

Breathable bandage ideal for teats

Leukopor Tape

5cm x 5m

Silicone Bandage

Ideal for milking cows (with teat cuts)

StopLick is a lick deterrent aid that covers bandages on animal's extremities and replaces the need for Elizabethan collars and bitter sprays. It delivers a mild tingle to the tongue, providing an effective treatment to prevent licking and promote the healing of wounds, post-surgical sites and lick granulomas. The non-invasive, battery powered design also allows the animal to behave normally

For wrapping treating hoofs during hooftrimming and for large wounds

Activon Tube 25g

100% Medical Grade Manuka honey

Algivon

Alginate dressing impregnated with 100% Manuka honey

Manuka honey brings the following properties:

- Aids in the reduction of bioburden
- Osmotic effect, drawing harmful tissue away from the wound bed
- Maintains the ideal moist wound healing environment

100% Manuka honey with no additives from New Zealand. Our Manuka honey is filtered and sterilised, making it suitable for application to wounds. Manuka honey will de-bride and de-slough and provides a moist wound healing environment.

Ideal for debriding necrotic tissue, or for topping up dressings where the honey has been washed away by exudate. Great for using in cavities, just wash away with saline solution.

Top Tip

Use Activon Tube in conjunction with Algivon or Algivon Plus for debriding and de-sloughing.

Features

- Manuka honey brings the following properties:
- Aids in the reduction of bioburden
- Osmotic effect, drawing harmful tissue away from the wound bed
- Maintains the ideal moist wound healing environment

Soft silicone tape which is gentle on the skin, this is particularly useful in animals with very delicate, friable skin which is vulnerable to damage. Silicone does not cell strip in the same way that other adhesives may damage tissue.

Siltape

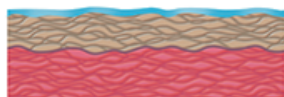

Silfex

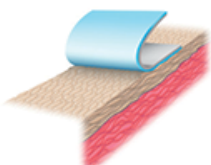

Soft silicone wound contact layer

Features

- Non adherent (adheres only to dry surrounding skin not to a moist wound)
- Atraumatic soft silicone, reduced pain on dressing change
- Soft and conformable
- Allows passage of exudate
- Hydrophobic Silfex soft silicone coating
- A wound contact non-adherent dressing made from polyester mesh coated with soft silicone.

Silfix® dressings conform to the skin's surface creating gentle adherence across the whole area.

Silfix® dressings gently adhere to the dry skin, not to a moist wound, preventing skin stripping and damage to healthy tissue at dressing change minimising patient stress and discomfort.

Silfix® dressings seal the wound margins helping to prevent maceration.

What is Vexoderm?

Vexoderm is a new generation wound dressing that cleanses and detoxifies the wound bed.

Its innovative design is the result of years of research on oxidative stress.

Why moist wound care?

With moist wound care great conditions are obtained in the wound bed for proper evolution of the wound (temperature, humidity and protection).

Thanks to its design, in addition to the benefits of moist wound care, Vexoderm also manages the exudate and reduces the excess of free oxygen radicals present in the exudate.

Vexoderm is a next generation wound healing dressing that cleans and detoxifies the wound bed thanks to its moisturising and antioxidant properties. The design is the result of years of research about how the mechanisms that regulate the organism antioxidant processes work.

Novel line of skin & wound care products with antioxidant and regenerative properties

Key advantages

For the patient

- Detoxifies wound exudate.
Neutralises the excess of reactive oxygen species in the wound environment.
- Manages the exudate.
Absorption capacity up to 20 times its dry weight.
- Cleans wound bed from non desired tissue.
- Reduces irritation and discomfort.
- Excellent wound care for an optimal skin recovery.

For the vet

- Adaptable and easy to apply and remove.
- It does not adhere to the wound.
- Professional wound care just for specialists.

Only 1 change every 7 days!

How does Vexoderm work?

Vexoderm combines 2 components from natural origin for an optimal wound care.

1 Lyophilised 100% plant origin matrix with high absorption capacity

2 Hydration solution with moisturising and antioxidant properties

Composition

Vexoderm combines 2 components for an optimal wound care:

- 100% plant origin matrix with high absorption capacity.
- Hydration solution with moisturising and antioxidant properties.

Presentation

- 9x4: Each box contains one 9x4 cm matrix and one 10 ml vial.
- 10x7: Each box contains one 10x7 cm matrix and two 10 ml vials.

Vexoderm
Gel

Innovative antioxidant hydrogel for skin care

Key Advantages

- Hydrates and protects skin & wounds
- Beneficial antioxidant activity
- Optimal skin preparation
- Creates film over damaged skin
- Reduces irritation and discomfort

High hydration capacity

Excellent Wound Healing

Benefits of using Vexoderm

- Removes necrotic tissue
- Extraordinary granulation tissue
- Excellent re-epithelization
- Complete healing
- Reduces number of dressing changes
- Prevents wound dehiscence

VETBOX®

- Incorporates safe vaccine storage with a temperature controlled fridge drawer.
- From medicines, injectables & equipment all stored in a safe & tidy manner

The Vetshop VETBOX modular storage system suits all vehicle types from pickups, jeeps and estate cars

- Durable & Sturdy
- Irish design & manufacture
- Removable, portable & adaptable
